Thanks Shereen,

Cc'ing all on original message. I had forgotten my normal GKMR R9 Liaisons, so adding them now.

Shereen, does OITA do the translation upon request?

I believe there are OPA/PIO CC's, is your approval required in addition to OITA?

Note that several of the R9 CC's seem to be in programs that coordination regularly with Mexican officials at the regional level.

Hi all –

OITA is good with the response. Did R9 get pulled in?

Thanks,

Shereen

Thanks, Mike.

Looping in Shereen Kandil, who can facilitate OITA review.

George Hull from OPA can work with you on this, as I'm out the first part of next week.

ALCON,

We have the substance of our response to the query from Baja California below. But we need help about the protocol for a response to a Mexican State. It seems it would go through or in coordination with OITA and OPA? This would also need to be translated.

I'm sending this to all that were on the forwarding chain plus HQ EOC, R8 RICT and R8 CIC.

Thanks,

Mike

Subject: RE: Gold King : Inquiry from PROFEPA in Baja CA regarding - Anima, spill - Rio San Juan, Nuevo Mexico

Mike:

Here's a rough translation of initial inquiry from Baja California:

I...request information regarding the spill of acidic and toxic solution that was present in the Animas River and flowed into the river San Juan and Colorado rivers. In Mexicali we are concerned and the State Congress asks for information, given that there have been complaints regarding probable mercury pollution in the Sea of Cortez.

I would propose responding along the following lines:

"EPA collected water and sediment samples from Lake Powell near the inlet of the San Juan River. Given the recent sampling results of reduced metals in the plume, EPA expects no significant impacts to Lake Powell, or points further downstream, associated with the Gold King Mine release."

"Most mercury surface water results for Regions 8, 6 and 9 did not detect mercury. Also, all but

one sample at one Colorado location that detected mercury were below the most restrictive Ambient Water Quality Criteria for aquatic life of 0.77 ug/l. Sample results can be viewed on the Gold King Mine Release web site at: <http://www2.epa.gov/goldkingmine>. The website can be viewed in Spanish.”

I pulled the gist of this response from the GKM website and added the reference to “points further downstream.” We might also consider adding some specific information on levels of mercury detected upstream and that EPA does not believe the Gold King Mine release has impacted mercury levels in the Sea of Cortez.

I don’t know what the process is for vetting this response but I think someone in OITA should review.

ALCON,

This regards a request for info from the Mexican State of Baja California.

Chris: Yes we will start the response. My ICP PIO thinks she has the substantive response but we will need to research how/who to respond. I would imagine HQ EOC, OPA and OITA will be involved? Plus we need translation support.

Laura, please staff this & coordinate with R8 WG as appropriate.

HQ EOC, R8 RICT cc'd for info.

Thanks,

Mike

Bill,

I'm forwarding an email from Baja California's PROFEPA, Sub-Delegado Jesus Jimenez Payan, in which he copy's PROFEPA's Delegado for BC, asking for information regarding the "Animas" spill. Per his email, he expresses concern in Mexicali and their State Congress has asked for information, while also noting complaints, regarding possible mercury contamination in the Sea of Cortez.

Estimado Químico Payan,

Gracias por su comunicación. Estoy a su disposición y por este correo paso su petición solicitando información, al respeto.

No dude en comunicarse, si hay alguna otra cosa en que pueda asistir.

Saludos cordiales.

Estimada Emily, esperando te encuentres bien, te saludo y a la vez solicito información en relación al derrame de solución acida y toxica que se presentó en el rio animas con afluencia al rio San Juan y este con el Rio Colorado. En Mexicali estamos preocupados y el Congreso del Estado nos pide información al respecto, toda vez que se han presentado denuncias, respecto a probable contaminación de mercurio en el mar de Cortez. Agradezco tu información. Un saludo
